

HYDRANT FLUSHING

Between May 1st and 31st,
the WTMUA will be performing its annual water main cleaning
by flushing the system at fire hydrants.

If you experience cloudy or slightly discolored water during this period,
it is most likely the result of the cleaning work.

If you are concerned about the condition of the water, or
if it continues over an extended period, or
the condition appears at times other than May 1st - 31st,
please feel free to call the MUA (908-876-3145).
